Instruction

1. Charge Mode
Connect the keyboard to the USB port with the included charging cable. The power indicator light turns red when charging and then turns off when fully charged.

2. Device Switch
Turn on the keyboard and tap any device button (device 1, device 2, or device 3 button) to switch between connected devices.

The device buttons are located on the upper right corner of the keyboard:

Device 1 (2.4G receiver mode)   Device 2 (bluetooth mode 1)

Device 3 (bluetooth mode 2)

2

3. Matching Mode

Device 1: tap the device 1 button (2.4G mode) and plug the included USB receiver into a USB port. If the connection is not established right away, you can set it as following:

Plug the USB receiver into a USB port and press ESC+ for 3s, then you can match the code.

Device 2: Tap the device 2 button (Bluetooth mode) so that the corresponding light flashes. Then press and hold the device 2 button for 3s so that the light starts flashing faster.
The keyboard "BT4.0+2.4G KB" can then be searched on your device. You can use the keyboard when it is connected successfully.

Device 3: Tap the device 3 button (Bluetooth mode) so that the corresponding light flashes. Then press and hold the device 3 button for 3s so that the light starts flashing faster.
The keyboard "BT4.0+2.4G KB" can then be searched on your device. You can use the keyboard when it is connected successfully.

4. Backlight ON/OFF

Tap to turn the backlight on or off and to control the brightness.

5. Battery Detection

Please charge the battery when its voltage is less than 3.2V, and the power indicator light flashes red.
